**PLASTICS BURNOFF CLEANING FORM**

Please complete this form to request a sample cleaning to remove organic material including plastics and polymer from your tooling and parts and include the form with the shipment to us. **IMPORTANT:** This is not a grit blasting operation, it thermally burnoffs off material from parts.

Please ship to the address above, "Attention: Sample cleaning".

We strive to turnaround sample cleanings in 3 business days upon receipt. Our Fluidized Baths can clean parts up to 15" in diameter, however, during test cleaning please send no more than 3 parts and keep the sizes to 4" diameter max and 8" in length or under. The maximum weight of any one part for sample cleaning is 15 pounds. We'll produce a video and take pictures of your tooling going into the Fluidized Temperature Bath and coming out. The cleaning results video report link will be emailed to your within a day or two of completion.

Note: By sending in parts for sample cleaning we reserve the right to use any related content for marketing and training purposes unless otherwise notified in writing.
